## Educational Background

*University of Computer Studies  
Mandalay*

Studied Bachelor of Computer Science  
(2019 - 2020)

*The Space Language Center*

Completed English Intermediate Class  
B1 (2023 - 2024)

## Profile

Enthusiastic Frontend Developer with hands-on experience in React.js, TypeScript, and Tailwind CSS. Skilled in building mobile-first, multilingual, and API-integrated web applications. Solid background in state management (Redux Toolkit, Zustand), React Query for data fetching, and next for localization. Proven ability to deliver responsive, performant, and scalable UIs. Passionate about continuous learning and collaborating with cross-functional teams.

# PROFESSIONAL EXPERIENCE

DevelopX

2025(May) – 2025(August)

Frontend Web Developer

Veteran Driver V1

## Project Description

A location-based mobile-first web application designed to help users discover, save, and organize local businesses across Southeast Asia. Veteran Driver V1 focuses on interactive map-based discovery, multi-language support, and a simple, intuitive user experience.

- Developed core frontend architecture using React 18 + Vite for optimized builds and fast rendering.
- Built interactive map-based location discovery with Google Maps API & Leaflet.js.
- Implemented multi-language support (EN, JA, KO, ZH) using i18next.
- Designed and developed tab-based navigation (Home, Favorites, Profile) with smooth animations (Framer Motion).
- Created favorites management feature (save, organize, and rename places).
- Integrated React Query + Redux Toolkit for global state management and asynchronous data fetching.
- Delivered responsive, mobile-first UI with PWA capabilities and custom Tailwind components.
- Collaborated with backend team on API structure, error handling, and performance optimization

Tech Stack: React 18, TypeScript, Vite, Tailwind CSS, Redux Toolkit, React Query, i18next, React Router DOM, Google Maps API, Leaflet, Framer Motion, Git, Figma

## My Role and Responsibilities

- Developed core frontend architecture using React 18 + Vite for optimized builds and performance.
- Designed and implemented tab-based navigation and layout for all major views (Home, Favorites, Profile).
- Built reusable components for map markers, category filters, and place cards with custom interactions.
- Integrated Google Maps API and Leaflet for real-time location discovery and visualization.
- Implemented multi-language architecture, handling language JSON files, routing, and UI alignment.
- Used React Query + Redux Toolkit to manage both global UI state and asynchronous data fetching.
- Designed fully responsive UI using Tailwind CSS and customized mobile gestures and touch zones.
- Collaborated with backend team on API structure, data handling, and error boundaries.
- Performed regular code reviews, accessibility checks, and QA with real-device testing.

# WORK EXPERIENCE

Anycall Mobile

2024(January) – 2024(September)

## Online Customer Service & Application Data Entry

### Job Description

- Provided online customer service and data management support for a leading mobile phone retail and e-commerce business. Ensured smooth digital sales operations, accurate product listings, and effective communication between customers, the sales team, and the development department.
- Collaborated with both the retail operations and the mobile app development teams to maintain synchronized product data, manage customer inquiries, and support digital marketing campaigns.
- Played a key role in maintaining data consistency across multiple digital platforms and improving user experience through structured content management and responsive online support.

### Tools & Technologies

- Communication & Sales Tools: Facebook Business Suite, Messenger, Viber
- Data Management: Google Sheets, Microsoft Excel (formulas, lookup functions), Local Inventory Software
- Content Management: WordPress CMS, Photoshop (image optimization), HTML/CSS
- Collaboration & Reporting: Google Workspace, Internal File Systems

## My Roles & Responsibilities

- Handled customer inquiries via Facebook, Messenger, and phone, ensuring prompt and professional responses.
- Managed product listings, stock updates, and promotions across online platforms and CMS.
- Processed and tracked daily orders, refunds, and reports with accuracy and attention to detail.
- Maintained and synchronized product data between WordPress and internal inventory files using Excel tools.
- Uploaded and optimized product images, categories, and pricing for a consistent digital showcase.
- Assisted in promotional campaigns and tracked KPIs including sales volume and customer satisfaction.
- Collaborated with sales, logistics, and development teams to ensure data accuracy and timely delivery.
- Trained a junior staff member in Messenger automation and order tagging.
- Gained foundational web development experience by shadowing a senior developer and practicing basic HTML, CSS, and data structuring.
