DevelopX

Frontend Web Developer

2024(September) – 2025(September)

Veteran Driver V1

Project Description

A location-based mobile-first web application designed to help users discover, save, and organize local businesses across Southeast Asia. Veteran Driver V1 focuses on interactive map-based discovery, multi-language support, and a simple, intuitive user experience.

- Developed core frontend architecture using React 18 + Vite for optimized builds and fast rendering.
- Built interactive map-based location discovery with Google Maps API & Leaflet.js.
- Implemented multi-language support (EN, JA, KO, ZH) using i18next.
- Designed and developed tab-based navigation (Home, Favorites, Profile) with smooth animations (Framer Motion).
- Created favorites management feature (save, organize, and rename places).
- Integrated React Query + Redux Toolkit for global state management and asynchronous data fetching.
- Delivered responsive, mobile-first UI with PWA capabilities and custom Tailwind components.
- Collaborated with backend team on API structure, error handling, and performance optimizatio

Tech Stack: React 18, TypeScript, Vite, Tailwind CSS, Redux Toolkit, React Query, i18next, React Router DOM, Google Maps API, Leaflet, Framer Motion, Git, Figma

My Role and Responsibilities

- Developed core frontend architecture using React 18 + Vite for optimized builds and performance.
- Designed and implemented tab-based navigation and layout for all major views (Home, Favorites, Profile).
- Built reusable components for map markers, category filters, and place cards with custom interactions.
- Integrated Google Maps API and Leaflet for real-time location discovery and visualization.
- Implemented multi-language architecture, handling language JSON files, routing, and UI alignment.
- Used React Query + Redux Toolkit to manage both global UI state and asynchronous data fetching.
- Designed fully responsive UI using Tailwind CSS and customized mobile gestures and touch zones.
- Collaborated with backend team on API structure, data handling, and error boundaries.
- Performed regular code reviews, accessibility checks, and QA with real-device testing.

WORK EXPERIENCE

Anycall Mobile

Online Customer Service & Sales Admin

2024(January) – 2024(September)

Job Description

Provided online customer service and sales administration for a leading mobile phone retail business in Myanmar. Ensured smooth order handling, customer communication, and sales reporting across digital platforms.

- Delivered timely and professional support to customers through Facebook, Messenger, and phone inquiries.
- Managed product listings, availability updates, and order coordination using online tools and inventory software.
- Processed daily orders and confirmed transactions across platforms.
- Maintained detailed sales records, stock movement logs, and assisted in preparing daily and weekly reports.
- Collaborated with the store's sales and logistics teams to ensure accurate product deliveries and updates.
- Handled conflict resolution, refund discussions, and escalations with a customer-first mindset.
- Supported customer retention by maintaining a polite, helpful, and engaging online presence.

Tools and Technologies:

Facebook Business Suite, Google Sheets, Excel, Viber, Sales Logs, Local Inventory Software

My Role and Responsibilities

- Monitored multiple communication channels and responded to inquiries in real-time.
- Ensured all product details were accurate and updated across platforms.
- Reported daily and monthly KPIs to the business owner, tracking order volumes and customer feedback.
- Managed bulk uploads and manual updates for product data, pricing, and promotions.
- Helped train a junior staff member to assist with Messenger automation and order tagging.

Application Data Entry & Web Dev Learning

Job Description

Worked alongside a mobile application development team to enter and manage structured business data while learning web development fundamentals in a self-driven setting.

- Exported product and business listing data from WordPress admin panel and synchronized content with internal inventory files using Excel formulas and lookup tools.
- Updated and verified data accuracy, including product names, categories, pricing, and availability, based on stock sheets and vendor-provided documents.
- Tagged listings with appropriate categories in WordPress, and created new categories where necessary to maintain a clean content showcasing for filters feature.
- Uploaded and optimized product images and banners using Photoshop templates provided by the design team.
- Participated in weekly and monthly promotional campaigns by applying discount pricing formulas to selected products and updating them within the CMS.
- Maintained clean and organized product galleries and metadata, ensuring consistency across desktop and mobile views.

My Role and Responsibilities

- Learned the importance of structured data and how it connects with app frontend design.
- Practiced writing semantic HTML and organizing layout blocks using flexbox and grid.
- Shadowed the senior developer to understand how the data appears in React components.
- Built small sample pages and forms locally to experiment with styling and JavaScript logic.
- Developed strong attention to detail while maintaining accurate, clean, and uniform content entries.
